EDUCATION

Amrita Vishwa Vidyapeetham | Coimbatore, Tamil Nadu **2024 – 2028**
B. Tech in Computer Science and Engineering *Current CGPA: 7.12*

Relevant Coursework: Machine Learning, Embedded Systems, Theory of Computation, Mobile Application Development, Generative AI, Data Structures and Algorithms.

SSVM World School | Coimbatore, Tamil Nadu

- Class 12 (State Board) – 92.4% (2024)
- Class 10 (State Board) – 93.8% (2022)

TECHNICAL SKILLS

Programming:	C, Python, Dart, HTML, CSS, JavaScript
Tools & Frameworks:	Flutter, FastAPI, OpenCV, Scikit-Learn, Git, GitHub, Keil uVision, VS Code
AI & ML Domains:	Computer Vision, K-Means Clustering, Generative AI, Vector Embeddings
Core Concepts:	Data Structures & Algorithms, Object-Oriented Programming, Embedded Systems
Databases & OS:	MongoDB Atlas, Firebase Firestore, Windows, Linux

PROJECTS & RESEARCH

BugLens – AI-Powered Bug to GitHub Issue Converter **Hacktoberfest Hack Day**

- Architected the core hybrid code retrieval engine connecting visual bug screenshots directly to repository source code without relying on external vector databases.
- Developed a unified scoring algorithm combining semantic search (embeddings), exact on-screen string matching, and stack-trace file resolution.
- Implemented an IDF-style weighting system to filter noise from common UI text, successfully isolating the top 12 candidate files for LLM reranking.

Canteen-Mobile-Dev

- Developed a real-time campus canteen application using Flutter and Dart with a dual NoSQL database synchronization system integrating Firestore and MongoDB Atlas.
- Implemented Role-Based Access Control (RBAC) for Admin and Student views, featuring digital wallet management, PDF invoicing, and GPS proximity verification.
- Integrated mock UPI/QR payment systems with roll-number validated balances and expandable menu catalogs.

KitClash

- Built a real-time computer vision web application designed for football officials and kit managers utilizing FastAPI, OpenCV, and Scikit-Learn.
- Engineered a K-Means clustering algorithm to extract dominant color profiles from football jerseys via upload or copy-paste.
- Evaluated color similarity using perceptual distance (ΔE) in the CIE LAB color space.

Lesss Gooo

- Developed an AI travel web application featuring a comprehensive multi-page UI/UX, landing page, and authentication flow.
- Designed an itinerary dashboard, booking manager, and profile settings focusing on a responsive and sleek user experience.

CERTIFICATIONS & LEADERSHIP

- **Blockchain Foundation Program:** Kerala Blockchain Academy (Focus: Blockchain & Cryptocurrency).
- **Master of Ceremonies & Public Speaker:** SSVM World School – Hosted school events and delivered public speeches, demonstrating strong communication, public speaking, and presentation skills.
